CONTEXT CruiseCtx2 EXTENDS CruiseCtx1 CONSTANTS

 $\begin{tabular}{ll} VEHICLE_MAX_SPEED \ viteza \ max \ a \ vehiculului \end{tabular}$

MAX_INACTIVITY limita max a timpului de inactivitate permis înainte ca sistemul si ia masuri, cum ar fi revenirea automata la modul Cruise Mode

AXIOMS

30 secunde de inactivitate

END

14.01.2025 19:38 Page 5 of 11

MACHINE CruiseControl **SEES** CruiseCtx2,discCtx VARIABLES cruise_mode booleana care indica daca modul cruise este activ follow_mode booleana care indica daca modul follow este activ pedal_command emergency_mode booleana care indica daca modul emergency este activ cruise_speed viteza curenta a vehiculului in modul cruise (limitata intre CRUISE_MIN_SPEED si CRUISE_MAX_SPEED)

distance_sensor valoare intreaga care reprezinta distanta pana la un obstacol (-1 indica lipsa datelor)

vehicle_speed valoare intreaga care reprezinta viteza curenta a vehiculului (limitata intre 0 si VEHICLE_MAX_SPEED)

safety_distance distanta de siguranta pentru modul follow (numar natural)

warning_alert booleana care indica daca un avertisment este activ

engine_state booleana care indica daca motorul este pornit sau oprit

t variabila de timp folosita pentru esantionare (numar natural)

canRead booleana care indica daca datele pot fi citite

workingClock booleana care indica daca ceasul de esantionare functioneaza

 $inactivity_timer$

INVARIANTS

```
inv1: cruise\_mode \in BOOL
    Modul de croaziera este activ sau inactiv
inv2: follow\_mode \in BOOL
    Modul de urmarire este activ sau inactiv
inv3: emergency\_mode \in BOOL
    Modul de urgenta este activ sau inactiv
inv4: cruise\_speed \in CRUISE\_MIN\_SPEED .. CRUISE\_MAX\_SPEED
    Viteza de croaziera trebuie sa fie intre limitele stabilite
inv5: engine\_state \in BOOL
    Motorul poate fi pornit sau oprit
inv6: distance\_sensor \in -1..SAFETY\_DISTANCE
    Senzorul de distanta poate fi intre -1 si distanta de siguranta
inv7: vehicle\_speed \in 0..VEHICLE\_MAX\_SPEED
    Viteza vehiculului trebuie sa fie intre 0 si viteza maxima permisa
inv8: safety\_distance \in \mathbb{N}
    Distanta de siguranta este un numar natural
inv9: warning\_alert \in BOOL
    Alerta de avertizare este activa sau inactiva
inv10: t \in \mathbb{N}
    Cronometrul de esantionare este un numar natural
inv11: canRead \in BOOL
```

inv13: $pedal_command \in PEDAL_COMMANDS$

Comenzile pedalei (0: fara actiune, 1: accelereaza, 2: franeaza, 3: reseteaza)

inv14: $inactivity_timer \in 0..MAX_INACTIVITY$

Indica daca se poate efectua o citire

inv12: $workingClock \in BOOL$ Starea ceasului de lucru

Cronometrul de inactivitate este intre 0 si limita maxima
